A Place for Growing Minds

PALS Daycare-Performing Arts and Languages will provide a great start for your child! We provide young children with an arts-infused education in a calm and nurturing environment. PALS Daycare uses a creative, arts-based teaching structure to bring out a child's natural interest in learning. The Arts allow children to think creatively, to build their own ideas, to solve problems in more than one way and try new things.

School Readiness

School readiness is stressed to prepare children for first grade including reading, math, computers, and science. We offer smaller class sizes to meet each child's individual needs.

Experienced Staff

Our classroom staff have numerous years of education, training and experience working in the early childhood field. Our arts specialists are well trained in their areas of expertise and offer a chance for children to express themselves in a variety of ways. We are committed to the development of healthy, happy children who have the opportunity to engage and learn from their environment.
